BRIAN SHAYNE

Nairobi, Kenya | 0768 488 971 | brianshayne350@gmail.com | github.com/shayne874

PROFESSIONAL SUMMARY

Network and software engineering professional with experience in enterprise networking, cybersecurity monitoring, automation, and data analysis. Skilled in LAN/WAN configuration, routing and switching, network troubleshooting, Python and Bash scripting, and infrastructure performance improvement. Strong working knowledge of security tools, cloud concepts, database integration, and software development across multiple languages and platforms.

TECHNICAL SKILLS

Networking & Security: Routing and switching, TCP/IP, DNS, DHCP, BGP, OSPF, VPNs, IDS/IPS, QoS, LAN/WAN administration, penetration testing with Kali Linux

Firewalls & Monitoring: Palo Alto, Cisco ASA, Splunk, Wireshark, SolarWinds

Programming & Development: Python, Bash, SQL, Java, Android Development, C++, C#, C, React, Kotlin, MongoDB, VB.NET, WordPress

Data & Cloud: Data analysis, automation, machine learning fundamentals, cloud computing, AWS

PROFESSIONAL EXPERIENCE

Network Engineer | Biometrics Technology Limited | July 2024 - November 2024

- Designed, configured, and maintained enterprise LAN/WAN networks to support reliable business operations.
- Improved network availability, reliability, and security through proactive monitoring, troubleshooting, and configuration optimization.
- Automated network administration tasks with Python and Bash, including scripts for log analysis and switch configuration backups.
- Analyzed traffic patterns and packet captures to identify latency issues and improve performance through QoS optimization.
- Monitored network security and performance using Splunk, Wireshark, and SolarWinds.
- Improved network throughput by 40% through targeted analysis and infrastructure tuning.
- Assisted with deployment and troubleshooting of Cisco routers, switches, and Dell EMC servers.
- Integrated databases to improve system functionality and operational workflows.

Shipping Associate | American Embassy | July 2023 - October 2023

- Supported shipping and logistics operations while maintaining accurate shipment documentation and records.
- Coordinated inventory tracking, package handling, and operational handoffs in a structured team environment.

Operations and Technical Support | MEBS Global Reach LTD | February 2019 - December 2020

- Assisted with operational and technical support activities to improve daily workflow efficiency.
- Collaborated with team members to resolve process issues and support consistent service delivery.

PROJECTS

Network Automation Tool | Python |

- Developed a Python tool to automate switch configuration backups and reduce manual network administration effort.

EDUCATION

Degree in Software Engineering | Zetech University | 2021

Relevant coursework: Networking, Cybersecurity, Data Structures and Algorithms, Machine Learning, Cloud Computing

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA)
- Cisco Cybersecurity Certification
- Version Control with Git and GitHub
- CrowdStrike Certified
- AWS Certified

LANGUAGES

English: Fluent | Swahili: Fluent

CORE STRENGTHS

Problem solving | Teamwork | Analytical thinking | Adaptability | Communication
